

### RAPID Rape / Kale / Stubble Turnip mixture

**INTERVAL** Forage Rape

**HOBSON** Forage Rape

**DYNAMO** Stubble Turnip

**KEEPER** Kale

**RAPID** is a blend of forage rape with a high-yielding stubble turnip. **RAPID** establishes quickly and gives palatable feed for all stock.

### SPRINT Forage Rape Mixture

**INTERVAL** Forage Rape

**HOBSON** Forage Rape

**SPRINT** is a top quality mixture containing two high-yielding forage rape varieties. This mixture helps to reduce leaf diseases which can attack the crop. **SPRINT** produces a very palatable, thick crop for all stock.

### FORAGE RAPE

**HOBSON** is an excellent variety with a wide-sowing window. Can be utilised in Summer, Autumn or Winter.

**HOBSON** is a very palatable forage.

**INTERVAL** is a Rape / Kale Hybrid which makes it more Winter hardy. It has been bred in Scotland for UK and Irish conditions. Exceptional high yields and very fast to establish.

### STUBBLE TURNIPS

**SAMSON** will produce high yields from its high quality, large, tankard shaped purple roots. Very palatable forage for all classes of stock.

**VOLLENDIA** has a leaf to root ratio of 60-40 and its resistance to bolting is unrivalled. Very good early vigour makes it suitable for sowing in May for feeding in July - August and sowing in August - September for feeding November - December.

### FODDER BEET

**ROBBOS** is a variety with red roots, 56% root in ground, good dry matter yield with low dirt contamination at harvest. The roots have a medium dry matter content which enables them to be fed whole or chopped.

**KYROS** is a well established variety. 57% root in ground. It is highly palatable and digestible.

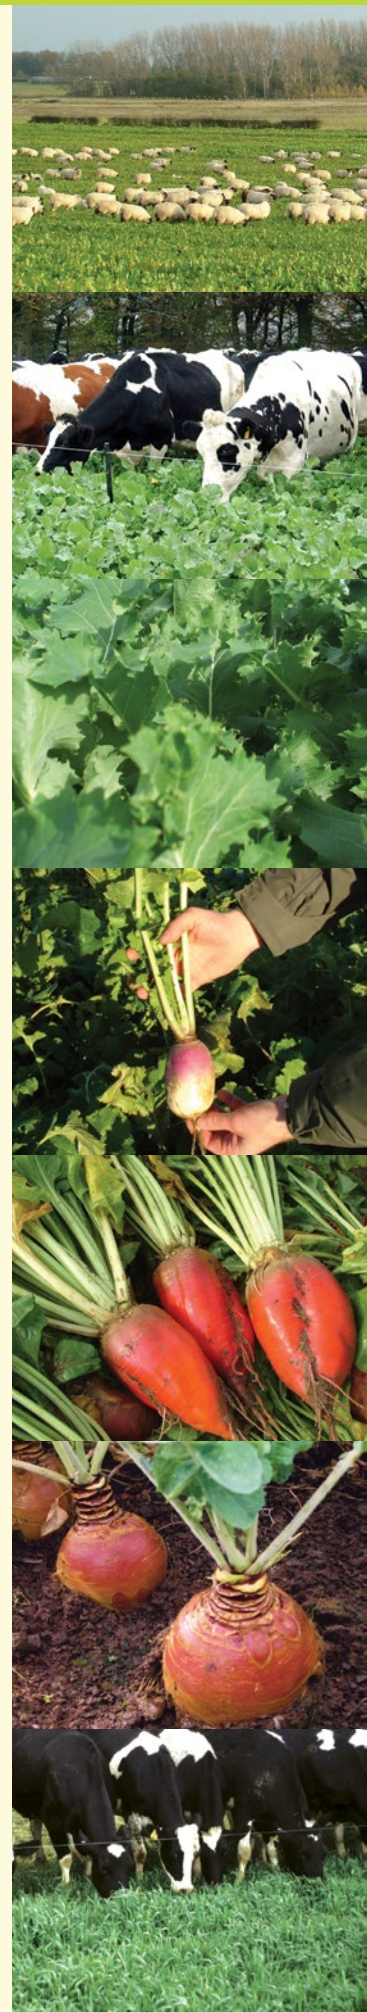

### SWEDES

**LOMOND** is available as natural seed and Grade H. **LOMOND** has massive dry matter yields of 80% digestibility. It is good for both human consumption and as a high energy Winter stock feed. Bred in Scotland for UK and Irish conditions.

**INVITATION** is a high-yielding, club-root resistant variety. Ideally utilised January onwards, it will produce large leaves and is Winter hardy.

### HUMBOLT Forage Rye

Best for an early-bite for dairy cows or as fresh forage for lactating sheep in Spring. Sow in September to October @ 75 Kilos per acre. If possible, select a free-draining, dry, sheltered field for best results.
